

The Evergreen State College  
 Evergreen Student Experience Survey 2006  
 Responses of Olympia Campus Students

**Evergreen's Contribution to Computer-related Skills**

Students were asked to answer questions about the extent to which Evergreen has contributed to their growth in a series of computer-related skills. This series of questions was designed to assist in understanding the range of computer technology activities and skills that Evergreen students are exposed to in the curriculum. Students are not expected to have worked in every skill area.

The series of questions below are sorted from highest to lowest mean response. Studying or doing research via the Internet or other online sources received the highest mean response (2.43) and the most-common response to this item was that Evergreen had contributed "Some" to respondents' growth in this area. Writing a paper for class using a computer also had a most-common response of "Some." All other items had a most common response of "Not at All." Even on questions related to very specialized computer-related skills, thirteen percent or more of Olympia campus respondents indicated that Evergreen had contributed "Some," "Quite a Bit," or "A Lot." For instance, 15.1% of Olympia campus respondents indicated that Evergreen had contributed "Some," "Quite a Bit," or "A Lot" to their ability to use Geographic Information Systems (GIS) or GPS, and 13.3% indicated that Evergreen had contributed "Some," "Quite a Bit," or "A Lot" to their ability to do computer programming.

Note: The mini-charts above are provided to give one a sense of how the responses are distributed among the choices: "Not at All," "Very Little," "Some," "Quite a Bit," and "A Lot." The Y-axes of all charts on this page are set to a maximum of 80% in order to make smaller percentages on the charts visible.
