

BTJ 2007 Status Update as of April 22, 2008:

BTJ Course Outcomes	Fall 10th day headcount	Dropped BTJ after 10th day, but before evaluation	Earned Full credit (2 credits)	Earned partial credit (1 credit)	No Credit	Unknown, not posted	% earned FULL credit (of those who did not drop course)	% earned NO credit (of those who did not drop course)
Total BTJ Cohort	103	4	59	5	34	1	59.6%	34.3%
WATEP Reportable subgroup (excludes those served by KEY)	35	3	19	1	12	0	59.4%	37.5%

BTJ Cohort Evergreen Persistence	Fall 10th day headcount	Headcount retained to winter 08	% retained to winter 08	Headcount retained to spring 08	% retained to spring 08
Total BTJ Cohort	103	89	86.4%	88	85.4%
WATEP Reportable subgroup (excludes those served by KEY)	35	30	85.7%	28	80.0%

Fall-to-spring persistence for BTJ participants is only slightly higher than the rate for all new first-time, first-year students (82.4%).

Now that all but 1 of the BTJ evaluations are posted, it is confirmed that 34% of the students failed to earn any credit. The January 18th report which you received included the known 26 students with NCR's posted to their records, but the Registrar predicted that as many as one-third would ultimately fail to earn credit once all credits were posted. Her prediction was correct. Furthermore, an additional 5% only earned half of their credits.

2 of the students who received No Credit were conditionally admitted, and thus will be at risk of academic warning or potentially a more strict college response.

Washington TRIO Expansion Program detail

There are only minor changes to report to the initial WATEP eligibility for the BTJ cohort. Based on new data developed by admin computing and financial aid, students who are below the federal poverty level can now be identified. That criteria has been added to the detail table below. This additional data element increased the WATEP eligible students in BTJ from 32 to 38.

The other change to the eligible WATEP population is that two additional BTJ eligible students joined KEY during winter quarter. Thus, 3 students are now not countable in the WATEP performance cohort, since they are being served by our existing federal TRIO program. That said, with the new "below poverty" group added, our countable WATEP cohort actually increased from 31 reportable students based on fall quarter analysis to 35 as of this date.

Total BTJ cohort	N=103	
WATEP Criteria	N	% of BTJ Cohort
Pell Grant	23	22.3%
Below Federal Poverty Level	27	26.2%
First Generation	9	8.7%
Disability	7	6.8%
Any WATEP Eligibility	38	36.9%
Served by KEY (Fall)	1	
Joined KEY (Winter)	2	
Remaining reportable WATEP students	35
