For the most part, academic room utilization for 2006/07 academic year was very consistent with previous years. There was still much heavier use of space in the middle of the week. However, in comparison to previous years, there was a little more balance throughout the week. In Fall 2003, there was 50% and above utilization Tuesday through Thursday and 15% on Fridays. During Fall 2006, both Tuesday and Thursday were below 50% with Friday nearing 30%. This indicates our prioritization we initiated two year ago has helped spread out utilization more evenly during the week. We have asked faculty to choose a schedule combination of either Tuesday **or** Thursday and if they requested both days, they would have less priority. Instead of consistently seeing a Tuesday, Wednesday & Thursday request, we are now seeing more Monday, Wednesday, Thursday or Tuesday, Wednesday, Friday combinations. This has helped spread out utilization a little more than in previous years.

The evening time utilization was also very consistent Monday through Thursday. There were some weekend courses that usually meet Friday evening, Saturday and Sunday, which indicates the small use on Friday evenings. Monday evenings seem to be the least desired by faculty and is usually 10% less than Tuesday, Wednesday and Thursday. This was also the case in 2003, which reflected the same percentages that were listed for 2006.

The most telling graph is the room utilization by hour that compares the entire academic year of 2006/07. With a slight drop in utilization for Spring, the trend is very consistent with all three quarters with minimal classes occurring from 8:00am-9:00am. The most utilized times are 10:00am-12:00pm and 1:00pm-3:00pm with utilization above 50% during these time blocks for most days and reaching 70% on Wednesday mornings (governance prevents classes from occurring Wednesday afternoon). This trend has always existed and the percentages from previous years are almost identical to 2006/07. Since there is no established prioritization in requesting times during the week to teach, this trend will continue into the future.

It is not surprising to see the Seminar 2 rooms with much higher utilization percentages than the Lab and Longhouse rooms. The rooms with and without audio/video (a/v) capability are not identified in the data, but the bottom line is teachers want to use a/v equipment for every hour of class time. The addition of Seminar 2 has allowed classes to meet during the desired teaching periods in a classroom with a/v capability. This has reduced the non-a/v classrooms to special event type spaces as opposed to weekly meeting rooms. For example, the five rooms in the Longhouse (no a/v) were used 15% of time during a typical week from 8:00am-5:00pm. This is an average of less than 1.5 hours per day.

The chart describing “All Event” utilization shows that not too much else happens on Tuesday, Wednesday & Thursday during the week outside of the regular academic schedule. The chart indicates there are rooms available for special events, meetings, etc., but the hourly chart demonstrates the middle of the day (10:00am-3:00pm) is more utilized by classes and those percentages jump up substantially on Tuesday, Wednesday, and Thursday leaving less desired rooms available in the middle of the week for non-academic classes. Therefore, Mondays and Fridays are the best days for non-academic events to occur because more highly desirable classrooms are available on these days. This explains the increase of room utilization for “All Events” on Mondays and Fridays.
